

CLIP ViT-B/32 — MILAN text-neuron analysis by transformer depth

(a) CLIP ViT-B/32: text-neuron fraction by transformer block

(b) Top-5 words per block
(red = >30% text neurons)

Block 0: ground, objects, colored, white, designs

Block 3: objects, colored, white, circular, black

Block 6: objects, colored, white, faces, ground

Block 9: objects, colored, white, red, ground

Block 11: objects, colored, white, red, circular
